Secured an aggregate of 85.1 percentage

PROJECTS

Housing Price Prediction | python3, Jupyter notebook · Oct. 2020 to Nov. 2020

Created a linear model using linear regression that will predict the sale-price of a house from its relation with variables such as number of rooms, area, number of bathrooms etc.

Course Enrolment System | PL/SQL, Oracle Database · Dec. 2020 to Jan. 2021

Create an online Course Enrolment System having following criteria:

- User has to register themselves for viewing the courses available. Both registration and login facilities should be provided.
- User has the option to enroll one course. Each course has a max intake capacity of 40. Once 41th candidate tries to enrol for a particular course, it will show 'course is full'.
- If the course is available the user can go for the payment option to complete the enrolment process

SKILLS

LANGUAGE: C++, Java

DATABASE: SQL

COMPUTER FUNDAMENTALS: Data structure and algorithms, DBMS, OOPs

OTHERS: Problem solving, Logical thinking, leadership, Good communication skill

ACHIEVEMENTS

- Stood #791 out of 17790 in Global coding challenge organized by credit-suisse.
- Solved 250+ question on Leetcode.
- Qualified TCS codevita pre-qualifier round 2020.
