Summary

Meticulous Data Analyst who always shares their passion for collecting, analysing and exploring data with a wide range of colleagues. An understanding of how different people respond to data allows me to get the right messages to the right people and a creative approach to problem solving ensures that my teams come up with the most profitable recommendations. Expert programmer of SQL , Python and Java and experienced with a wide range of data models. Critical thinker who believes that data is never exhausted, only repurposed.
